

CURRICULUM VITAE OF PETER C. HOUK

August 2019

I. Personal Information

Place of Birth: Maryland, U.S.A.
Marital Status: Married
Address: P.O. Box 4521
Hagatna, GU. 96932
Email: peterhouk@gmail.com
Website: <https://www.uog.edu/ml/labs/houk>

II. Education

- Florida Institute of Technology, Ph.D. in Marine Biology, 2006.
Advisor: Dr. Robert van Woesik
- University of Guam, M.S. in Biology/Marine Science, 1999.
Advisor: Dr. Charles Birkeland
- Northwestern University, B.S. in Environmental Engineering, 1996.

III. Positions Held

- Tenured Associate Professor, University of Guam Marine Laboratory – Conduct grant-related research, teach courses, and advise students on projects related to population, community, and conservation ecology, with a focus on coral-reef habitats. Courses offered include quantitative population ecology and advanced statistics for graduate student research. Research is focused on the influence local and global stressors to coral and fish assemblages, fisheries, and linking science with adaptive management.
- Chief Scientist and Post-Graduate Researcher, Pacific Marine Resources Institute – Lead scientific researcher and co-founder of a non-profit organization dedicated to working in partnership with fisheries and coral-reef monitoring across the Pacific. Oversee and assist with regional science projects, collaborate with regional and global initiatives, provide technical assistance for collaborative data analyses, and write manuscripts and grants. July 2010 – February 2013.
- Marine Biologist, Commonwealth of the Northern Mariana Islands Division of Environmental Quality – Head of the jurisdictional long-term marine monitoring program, disseminate information for science, management and policy, publish manuscripts, and write external and programmatic grants. June 2000 – June 2009.
- Adjunct Faculty, Northern Marianas College - Teach courses in community ecology, coral and algae taxonomy, survey methods, and integration of biological data with GIS systems. These courses provide CNMI's resource management agencies with trained personnel. August 2004 – 2012.

IV. Awards, Memberships, and Collaborations

- PEW Fellowship Nominee 2016 for ecosystem-based fisheries management and

improving the foundation for science-based fisheries policies on coral reefs. I was nominated but not awarded this prestigious fellowship.

- Member of the Micronesian Challenge Scientific Advisory Panel - This group advises regional leaders on the science backing a conservation movement to “effectively conserve” 30% of marine and 20% of terrestrial resources throughout Micronesia. The group is tasked with developing defensible, science-based criteria to evaluate the progress of the movement and linking science with management. (2010 - present)
- Advisory Council, National Marine Sanctuary of American Samoa – Research seat on the board, assist in reviewing local and federal conservation plans and strategies, share science for improved decision making (2015 - present).
- National Science Foundation Earth Cube Initiative – Collaborating member of a coral-reef working group that aims to integrating big datasets across disciplines. (2014 - 2016)
- Board Member, Western Pacific Coral Reef Institute - Together with regional partners, this program defined major research needs across the region and solicited for coral reef research projects to address pressing needs. The board was responsible for reviewing and selecting projects on a competitive basis (300K annually). (2010 - 2014)
- Micronesian Conservation Trust Technical Science Committee – This program defines major research needs across the region and solicits for coral reef research and management projects to address pressing needs. Our committee is responsible for reviewing and selecting projects on a competitive basis (250K annually). (2010 - present)
- The Nature Conservancy. Collaboration with an ongoing Pacific Ocean wide marine biodiversity and ecological assessment program. (2006 - present)
- National Atmospheric and Oceanic Administration – Served as a member of both regional and local coral conservation action strategy committees. (2005 - present)
- Palau International Coral Reef Center – Active, continuous collaboration with this center for regional excellence on numerous projects and publications across Micronesia. (2005 - present)

VI. Publications and Reports

Book Chapters:

1. Houk, P. 2010. Volcanic disturbances and coral reefs. In: Encyclopedia of Modern Coral Reefs. Springer-Verlag, USA. Aspects of biology and ecological functioning of coral reefs in Guam and the Commonwealth of the Northern Mariana Islands. In: R.E. Dodge et al., editors. Coral reefs of the USA. Springer, USA.
2. Richmond, R.H., Houk, P., Trianni, M., Wolanski, E., Davis, G., Bonito, V., and V.J. Paul. 2008. Aspects of biology and ecological functioning of coral reefs in Guam and the Commonwealth of the Northern Mariana Islands. In: R.E. Dodge et al., editors. Coral reefs of the USA. Springer, USA. pp 719-740.
3. Riegl, B.M., Purkis, S.J., Houk, P., Cabrera, G., and R.E. Dodge. 2008. Geologic Setting

and Geomorphology of Coral Reefs in the Mariana Islands (Guam and Commonwealth of the Northern Mariana Islands). In: R.E. Dodge et al., editors. *Coral reefs of the USA*. Springer, USA. pp. 691-718.

Peer-Reviewed Journal Articles:

Submitted and in prep

1. Johnson, S.M., Reyew, B., Yalon, A., Mclean, M., Houk, P. *In review*. Contextualizing the social-ecological outcomes of coral reef fisheries management.
2. Camacho, R., Houk, P. *In review*. Decoupling seasonal and temporal trends in seagrass assemblages reveals the role of differing environmental regimes and establishes management priorities.

2019

VII. Invited Reviews and Academic Editing

Academic editor

- PLOS One (2018 to 2019)

Peer Reviewer

- Coral Reefs: 2006; Marine Biology: 2007; Journal of Experimental Marine Biology and Ecology: 2009; Pacific Science: 2005; Journal of Oceanography: 2010; Marine Ecology Progress Series: 2013; Journal of Coastal Management: 2014; PLoS ONE: 2013; Bioscience: 2015; Journal of Geophysical Research: 2016; Diversity: 2016; NSF Biological Oceanography grant reviews: 2014; Frontiers in Ecology and the Environment: 2016; Nature Ecology and

Evaluation: 2018.

VIII. Research Grants (2010 – present)

- 2019-2021 United States Environmental Protection Agency: USD \$276,000. This competitive award was granted to co-PI's Peter Houk and Frances Castro to quantify the relative influence of localized stressors on Guam reefs and build a framework for predicting the future of reefs, generally, exposed to localized and global stress.
- 2018-2020 Micronesian Conservation Trust: USD \$72,000. This *competitive* award was sub-granted to Peter Houk (University of Guam Marine Laboratory) to enhance coral-reef monitoring activities, investigate climate change at regional and local scales, conduct collaborative data development, and disseminate results across. This is part of a long-term, ongoing project (see below).
- 2018-2019 National Fish and Wildlife Foundation, Coral Conservation Grant: USD \$50,000. This *competitive* award was sub-granted to Peter Houk, Sarah Lemer, and Javier Cuetos-Bueno to examine species response traits in coral-reef fisheries with respect to phylogenetic trees.
- 2017-2019 Saltonstall-Kennedy Grant Program, National Oceanic and Atmospheric Administration: USD \$107,000 per annum. This *competitive* award was sub-granted to Peter Houk and Javier Cuetos-Bueno (University of Guam Marine Laboratory) to build a fisheries dependent monitoring network across Micronesia and build regional and local analytical frameworks.
- 2017-2018 Micronesian Conservation Trust: USD \$57,000 per annum. This *competitive* award was sub-granted to Peter Houk (University of Guam Marine Laboratory) to enhance coral-reef monitoring activities, conduct collaborative data development, and disseminate results across Micronesia. This is part of a long-term, ongoing project (see below).
- 2016-2017 United States Environmental Protection Agency Wetlands Program Development Grant. USD \$300,000. This competitive award was granted to the American Samoa Environmental Protection Agency in partnership with two other local agencies and Dr. Peter Houk to examine drivers of water quality, fishing pressure and coral-reef condition.
- 2016 The Nature Conservancy. USD \$50,000. This award was granted to Dr. Peter Houk to examine coral-reef resilience in Chuuk State Micronesia following a major disturbance event and identify ecosystem indicators that are best predicted by extensive reef monitoring data.
- 2016 National Oceanic and Atmospheric Administration Coral Conservation Program: USD \$68,000. This competitive award was granted to support post-graduate research to identify management units for multispecies coral-reef fisheries that are based upon differing species-level responses to fishing pressure.
- 2014-2015 Micronesian Conservation Trust: USD \$56,000. This competitive award was granted to Dr. Houk to host an emerging post-graduate researcher dedicated towards improving the scientific foundation for ecosystem-based fisheries management (Javier Cuetos-Bueno).
- 2014-2015 National Fish and Wildlife Foundation: USD \$49,000. This *competitive* award was granted to Dr. Houk and a graduate student to build a standardized fishery-dependent monitoring program in Kosrae, Federated States of Micronesia, and integrate fisheries catch

dynamics with coral-reef monitoring and synthesize ecosystem-based targets for management.

- 2014-2015 United States Department of Defense: USD \$640,000 per 18 months. This *competitive* award was granted to a team of four principle investigators at the University of Guam Marine Laboratory, including Peter Houk as the coral biologist/quantitative scientist/project manager. This project will provide a robust characterization of coral reef habitats across all military lands on Guam.
- 2014-2016 Micronesian Conservation Trust: USD \$57,000 per annum. This *competitive* award was sub-granted to Peter Houk (University of Guam Marine Laboratory) to enhance coral-reef monitoring activities, conduct collaborative data development, and disseminate results across Micronesia.
- 2011-14 Micronesian Conservation Trust: USD \$55,000 per annum. This *competitive* award was granted to Peter Houk through a non-profit organization, Pacific Marine Resources Institute (PMRI), and more recently the University of Guam Marine Laboratory to build, maintain, and analyze coral-monitoring datasets across Micronesia.
- 2013 American Samoa Coral Reef Advisory Group: USD \$38,000. This *competitive* award was provided to Peter Houk to evaluate the individual contributions of localized stressors towards predicting decadal dynamics in coral-reef assemblages on Tutuila, American Samoa.
- 2010 Western Pacific Coral Reef Institute: USD \$47,000. This *competitive* award was granted to Dr. Peter Houk to document the current status of coral-reef atolls across the Marshall Islands, and establish a standardized monitoring program to evaluate change across atolls and through time.
- 2011 National Oceanic and Atmospheric Administration Domestic Coral Reef Conservation Program: USD \$50,000. This *competitive* award was granted to Peter Houk through a non-profit organization, Pacific Marine Resources Institute (PMRI), to assist with coral-reef monitoring and research programs across the Marianas Archipelago, including data collection, analyses, and publication development.
- 2010 CNMI Division of Environmental Quality: USD \$66,000. This *competitive* award was granted through a non-profit organization, Pacific Marine Resources Institute (PMRI), to: 1) assess the benefits of major watershed restoration activities upon Laolao Bay, Saipan, and 2) evaluate change in coral reef assemblages since 1992 using a historical baseline pertinent to evaluate change, and causes of change.
- 2010 National Fish and Wildlife Foundation: USD \$36,500. This *competitive* award was granted through PMRI to host a data analysis workshop to improve the local capacity of Micronesia's coral monitoring programs to evaluate and process ecological datasets. Focus was given to univariate and multivariate analyses, and four notable software platforms.
- 2010 National Oceanic and Atmospheric Administration General Coral Reef Conservation: USD \$39,000. This *competitive* award was granted to Peter Houk through a non-profit organization, Pacific Marine Resources Institute (PMRI), to conduct research to examine resiliency patterns on Yap State, FSM, coral reefs in conjunction with their long-term monitoring efforts.
- 2010 The Nature Conservancy: USD \$14,500. This *competitive* award was granted to Peter Houk through a non-profit organization, Pacific Marine Resources Institute (PMRI), to

conduct research on CNMI's fish markets, and integrate findings into a Micronesia-wide framework.

- 2010 National Oceanic and Atmospheric Administration Pacific Islands Marine Protect Area Community: USD \$25,000. This award was granted to Peter Houk through the above noted federal agency to produce an ecological data management, manipulation, and analyses guidebook using regional datasets. The manual will be associated with a regional workshop in July 2010.

VIX. Analytical Experience

- Proficient in modeling ecological and environmental data with R, and associate packages for statistical analyses and population modeling, PRIMER and CANOCO multivariate software packages, ArcGIS geographic information systems, ER-Mapper remote sensing software, and numerous others approaches common to contemporary science and research.

X. Supervised and Collaborative Research

Students

- David Benavente, MSc, University of Guam, Graduated 2015.
- Rodney Camacho, MSc Candidate, University of Guam, Graduated 2016.
- Matthew McLean, MSc Student, University of Guam, Graduated 2015.
- Steven Johnson, MSc Student, University of Guam, Graduate Fall 2017.
- Jessica Deblieck-Gradyan, MSc Student, University of Guam, 2015.
- Dalia Hernandez-Ortiz, University of Guam MS student.
- Andrew Jarrett, University of Guam MS student.
- Jacques Idechong, MS Student, University of Guam.
- Christy Starsinic, University of Guam MS student.

Post-graduate researchers

- Javier Cuetos-Bueno, Post-graduate researcher, University of Guam, 2015-2018.

Recent external collaborators

- John Claussen, Packard Foundation
- Javier Cuetos-Bueno, The Nature Conservancy, Micronesia Program
- Emily Darling, Wildlife Conservation Society
- Yimnang Golbuu, Palau International Coral Reef Research Center
- Alison Green, The Nature Conservancy Coral Triangle Program
