

BUILD EXITO is looking for **curious, passionate, and committed** undergraduates who want to **make a difference** in the world by engaging in research careers. EXITO takes students who have three years left until degree completion and prepares them for success in graduate school and beyond. Students who become EXITO Scholars have the chance to benefit from EXITO's **innovative program model**.

BUILDEXITO

A SUCCESSFUL RESEARCH PATHWAY

Integrated Curriculum

During their first program year, Scholars take the Gateway to Research course in preparation for biomedical research opportunities. In addition, Scholars receive ongoing Enrichment Sessions and support in pursuing and applying to graduate school and other professional opportunities.

Developmental Mentoring

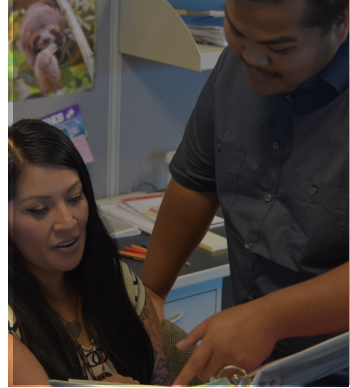

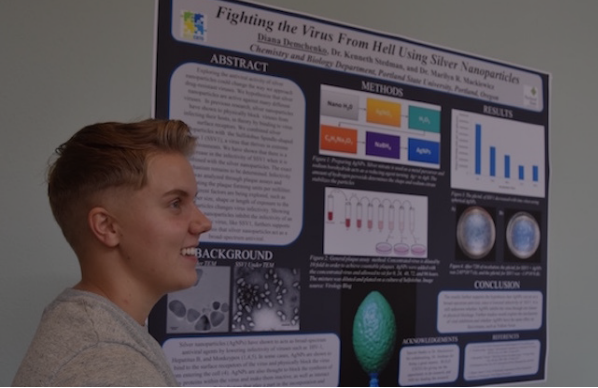

BUILD EXITO offers a team mentoring approach to meet the multi-dimensional needs of Scholars. Faculty and peer mentors will support Scholars' research training, academic progress, career development, and more.

Supportive Environment

BUILD EXITO is working to transform the university to better address the personal, social, academic, and financial needs of Scholars. Scholars have access to an EXITO academic advisor and financial advisor and a team of faculty and staff who are trained and ready to support students and their families.

Research Experience

The BUILD EXITO program provides the chance for Scholars to gain exposure to research that fits within their areas of interest. Scholars will have access to researchers from a range of disciplines within health-related fields (e.g., biomedical, behavioral, social, clinical, and translational research).
