

## About CNAS Assessment

CNAS offers undergraduate degrees in Agriculture, Biology, Chemistry, Computer Science, Computer Information Systems, Consumer and Family Sciences, Mathematics and Social Work. CNAS also offers graduate degrees in Biology, Environmental Science and Social Work. One of our missions is to 'deliver quality science – based programs that are relevant to the local community, nationally competitive, and recognized globally'. To enhance the college's mission and goals and the effectiveness of all of its academic programs, improvement on teaching and student learning must play a major role. The CNAS Assessment Committee was formed to promote, support, and coordinate all assessment efforts across the college at every level, (course, program, GE, CNAS's support programs, institutional, etc.), for the purpose of improving teaching and student learning.
