

## UNIVERSITY OF GUAM School of Engineering

The School of Engineering started as a Pre-Engineering Program, which was established in 1989 to help fill the chronic need for local engineers for Guam and the other islands in the Western Pacific.

In September 2016, the UOG Board of Regents formally established the new School of Engineering, and in February 2019, the Board approved a four-year Bachelor of Science in Civil Engineering for the School of Engineering.

In September 2024, UOG's Bachelor of Science in Civil Engineering degree program earned ABET accreditation for a six year term.

- **32 Civil Engineering Graduates since 2021**
- **225 students in the program in AY23-24**
- **Partners in workforce development and career pathways for UOG Engineering students and graduates:**
  - Naval Facilities Engineering Systems Command (NAVFAC) Marianas
  - University of Hawai'i at Mānoa and Pearl Harbor Naval Shipyard
  - Cabras Marine Corporation

## FAST FACTS

- Cost: \$7.9 million
- Estimated completion date: April 2025
- 16,000 square feet of floor space over two stories.
- Designed by RIM Architects, design build contractor awarded to Future World Construction, with funding from USDA, Office of the Governor, and other sources through the UOG Endowment Foundation.
- The building features specialized laboratories, classrooms, meeting spaces, and faculty offices outfitted with a wide array of cutting-edge engineering equipment to meet academic and research requirements.
- This is the third construction project to break ground at UOG in recent weeks (Nursing Annex and WERI Building). All three buildings focus on the development of the local workforce and STEM fields.
